Reasons For Clean

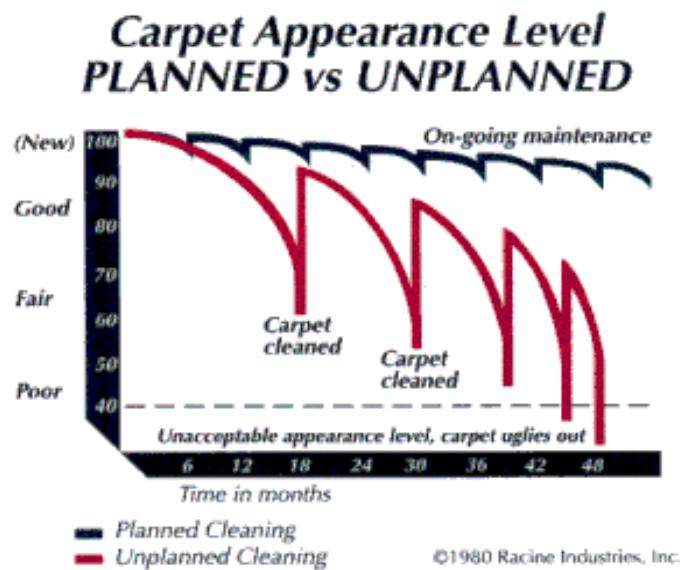

Clean floor coverings...

- Are more attractive
- Contribute to a healthy indoor environment
- Create a good impression on your clients and employees
- Last longer..saving you money!

Clean Carpet Saves Money

Regular maintenance preserves a consistently clean appearance and reduces wear

Planned Cleaning vs. Unplanned

Planned cleaning:

- Is proactive
- Keeps clean carpet clean
- Is results driven
- Eliminates problems

Unplanned Cleaning:

- Is reactive
- Cleans dirty carpet
- Is activity driven
- Leads to problems

Commercial Carpet Care Issues

- Commercial carpets are often glued to the floor, reducing airflow
- Loop design vs. cut pile
- Recurring spill stains are a common nightmare for commercial carpet

→ Revive processes are designed for the commercial environment

The Soil in Your Carpets

- 80% Dry
- 20% Sticky/Oily

→ Dry soil management is the front line in maintaining your carpets

→ Carpet cleaning addresses the sticky/oily soil

The Revive Concept

Carpet cleaning is about...

- **Results**... first and foremost!
- **Equipment** – We carefully choose tools based on their usefulness to the situations we encounter
- **Technology** – We utilize cleaning technologies designed for the unique requirements of the commercial environment
- **Methodology** – How equipment and technology are utilized to produce results

“WholeClean” Integrated Maintenance Program

- Analysis of wear, traffic and condition
- Choice of carpet cleaning methods
 - Low Moisture Methods
 - Hot Water Extraction
 - Encapsulation technology
- Program fit to requirements
- Consultation on daily maintenance practices
- ✓ Perpetual Clean Program

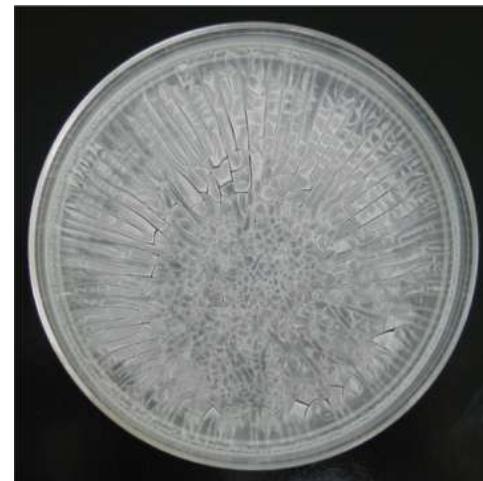

It's All About The Results

- Our WholeClean system can restore even the worst carpet to an acceptable appearance level
- We have the tools to tackle even the heaviest soil loads
- Our low moisture cleaning methods can have you back on your carpets in as little as an hour
- We utilize encapsulation technology designed to keep your carpets clean longer

Carpets Stay Clean Longer

We utilize cleaning technology formulated with a special encapsulating agent called Crystalon3. Soil that is binding to the carpet fiber is removed. A built-in protector helps keep the carpet clean longer. The result is residue free carpets that don't attract soil, vacuum easier and look better!

No More Recurring Spill Stains

Recurring spill stains are the number one cause of frustration for owners of commercial carpet. Spills soak all the way down the carpet fiber to the backing and commonly return to the surface after the carpet is cleaned. Our unique “spill stop” treatment will stop recurring spill stains in their tracks!

Demonstration Available!
